

Bensu Evaline Efe

Professor Dawn Harrison

CSC 121 – Python Programming

02 February 2026

2.4 – Name Cases

The screenshot shows a code editor interface with a dark theme. On the left, there's a sidebar with various icons for file operations like copy, paste, and search. The main area displays a Python script named 'name_cases.py' with the following code:

```
1 name = "bensu evaline efe"
2 print(name.lower())
3 print(name.upper())
4 print(name.title())
```

Below the code editor is a terminal window titled 'TERMINAL'. It shows the command-line output of running the script:

```
stjernernev@stjernernev-MacBook-Pro ~ % /usr/local/bin/python3 /Users/stjernernev/Desktop/name_cases.py
bensu evaline efe
stjernernev@stjernernev-MacBook-Pro ~ % /usr/local/bin/python3 /Users/stjernernev/Desktop/name_cases.py
bensu evaline efe
BENSU EVALINE EFE
Bensu Evaline Efe
stjernernev@stjernernev-MacBook-Pro ~ %
```

The terminal also includes status information at the bottom: 'Ln 4, Col 20 Spaces: 4 LF {} Python Signed out 3.14.2'.
